Profile

Junior Frontend Developer & Fresh Graduate in Information Systems (ITB Stikom Bali). I have experience in developing dynamic UI components through collaborative freelance projects. I am accustomed to working in teams (peer-coding) and have the ability to quickly adapt to the latest frontend technologies to deliver efficient digital solutions.

Work Experience

Project Aubot - Frontend Developer (Freelance)
March - July 2025 [View Website]

- **User Interface (UI) Development:** Transforming designs into clean and functional frontend code using **Next.js**.
- **Responsive Design Implementation:** Ensuring the application runs optimally on various devices (Mobile, Tablet, and Desktop) using **Tailwind CSS** with a mobile-first approach.
- **API Integration:** Connecting the frontend with backend services through RESTful API integration to ensure dynamic and real-time data exchange.
- **Team Collaboration:** Collaborating with teammates in a cooperative development environment, using **Git/Github** for management.

Project Booking Boat - Frontend Developer (Freelance)
July - September 2025 [View Website]

- **Modern Web Development:** Build an interactive, high-performance boat booking application interface using **Next.js** and **Tailwind CSS**.
- **Advanced Data Fetching:** Implement **TanStack Query** (React Query) to efficiently handle data retrieval from APIs, including loading state management, error handling, and data caching.
- **State Management:** Manage global application state (such as order data and authentication) using **Zustand** to ensure consistent data flow across components.
- **Responsive & Multilingual UI:** Ensuring the website displays perfectly on all screen sizes and supports multilingual features (English/Local) for international users.
- **Agile Collaboration:** Working together in a team of developers with **Git/Github** workflow, conducting regular coordination for feature synchronization and bug fixes.

Project Undangan Online - Frontend Developer (Freelance)
2025 [View Website]

- Developing an interactive digital invitation platform using **Next.js** and **Tailwind CSS**.
- mplementing dynamic guest name personalization features using **URL Query Parameters**.
- Optimizing application performance and deployment through the **Vercel** platform.

Educational Background

Bali Global Vocational School of Information Technology, Denpasar
July 2017 - April 2020
Software Engineering (RPL)

ITB Stikom Bali
September 2020 - August 2025
Information Systems

Skill

Core Technical Skill

Frontend :

- Next Js
- React
- JavaScript
- Tailwind CSS

State Management : Zustand

Data Fetching : Tanstack Query

Tools & Ecosystem

- Git & Github
- Vercel
- Postman
- Figma
- Package Managers

Soft Skill

- Team Collabration
- Problem Solving
- Fast Learning
